

DILIMULATI KAIWUSAIER

California | (669)272-6163 | kawsar970815@gmail.com | kaiwusaier.d@northeastern.edu

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Cloud/backend developer with a background in finance operations and an MPS in Informatics focused on Cloud Computing. Build backend-heavy applications using FastAPI, Node.js, PostgreSQL, REST APIs, and React dashboards. Strong at translating operational workflows into rule-based systems, data processing pipelines, audit/reporting tools, and AI-assisted summaries. AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner.

EDUCATION

NORTHEASTERN UNIVERSITY, BOSTON, MA

DEC 2025

Master of Professional Studies in Informatics – Cloud Computing Applications and Management GPA:3.87

Coursework: Amazon Web Service (AWS) Cloud Architecting, Cloud Analytics, Network Security, Web Design & Development, Database mngmt

XINJIANG UNIVERSITY OF ECONOMICS AND FINANCE, CHINA

JUN 2020

Bachelor of Economics: International Economics And Trade

Coursework: Econometrics, International Finance, Statistics, Business Data Analysis, E-commerce, Data Analytics & Business Intelligence

SKILLS AND CERTIFICATIONS

- Frontend Development: **React, TypeScript, HTML/CSS, JavaScript, Dashboard UI**
- Backend Development: **Python, SQL, REST APIs, Node.js, Express, Flask**
- Databases: **SQL, PostgreSQL, Pandas, MongoDB**
- Cloud Technologies: **AWS (S3, RDS, EC2, VPC, Lambda, ECS), Git, Amplify, Docker**
- AI & Automation: **OpenAI API, prompt engineering, rule-based logic, text summarization, report automation, SageMaker**
- Certifications: **AWS Certified Solutions Architect – Associate (SAA), AWS Certified Cloud Practitioner (CLF)**

PROJECT EXPERIENCE

Independent Software Projects | Backend, Cloud, and AI-Assisted Systems | 2026

[Portfolio](#)

TradeReconOps | Cross-Border Reconciliation & Audit Workflow Platform

Software Engineer - Backend & Data Processing

Tech Stack: Python, FastAPI, PostgreSQL, React, Pandas, AI Audit Summary, CSV Processing

- Built a reconciliation platform comparing USD bank records with CNY ledger data using FX conversion.
- Implemented rule-based classification for matches, FX variance, mismatches, duplicates, and unmatched records.
- Developed review exposure and risk scoring logic to prioritize high-impact reconciliation exceptions.
- Generated dashboard metrics, Markdown audit reports, and AI-assisted audit summaries.

CloudCost AI | AWS-Style Cloud Cost Optimization Dashboard

Cloud Engineer – Cloud & Backend

Tech Stack: React, TypeScript, Node.js, Express, PostgreSQL, Drizzle ORM, OpenAPI

- Built a dashboard for analyzing AWS-style EC2, RDS, S3, and EBS resource inventories.
- Implemented rule-based checks for idle compute, oversized databases, unattached storage, and security risks.
- Designed Cloud Health Score, estimated savings, priority findings, and executive recommendations.
- Developed REST APIs for resources, CSV upload, analysis runs, dashboard metrics, and reports.

Stockwise | Inventory Management with AI Restock Insights

Software Engineer – Backend & AI-Assisted Systems

Tech Stack: Python, FastAPI, PostgreSQL, React, Docker, SQLAlchemy

- Developed product, sales, restock, and supplier workflows with database-backed APIs.
- Implemented stock-in and stock-out logic to update inventory after sales and restocks.
- Built rule-based restock insights using sales velocity, days left, reorder flags, and urgency tiers.
- Designed an AI Provider layer for daily restock summaries and per-product recommendations.

WORK EXPERIENCE

Xinjiang Construction Company, CHINA | 3 Years

Oct 2020 - Dec 2023

Finance Assistant

- Reconciled bank statements, internal financial records, and transaction-level discrepancies across monthly reporting cycles.
- Assisted in improving reconciliation workflows using Excel, SQL-based queries, and structured data checks.
- Maintained financial records and supported data validation processes to improve reporting accuracy across accounting and operations teams.
- Supported financial reporting and document access workflows using cloud-based storage concepts.
- Collaborated with finance, operations, and management teams to translate reporting needs into structured reconciliation outputs.

Evergrande Group – China, CHINA | 6 Months

Mar 2020 - Oct 2020

Real Estate Sales Associate

- Assisted in implementing a **customer relationship management (CRM) system**, improving lead tracking efficiency by 30% and increasing conversion rates.
- Conducted market research and data analysis on property trends, utilizing Excel and SQL to identify high-potential locations, contributing to a 15% increase in sales performance.
