SUMMARY

Data Analyst with experience across e-commerce, financial operations, and independent research, translating operational and financial data into decisions that support business performance. Skilled at identifying patterns in complex datasets and framing findings into clear, actionable recommendations. Background includes 3 years in financial operations.

SKILLS AND CERTIFICATIONS

Analytics & Visualization: SQL, Python, Excel (Pivot Tables, VLOOKUP), Tableau, Power BI, Data Visualization, Data Cleaning & Wrangling, Dashboard Design, KPI Reporting, Trend Analysis, A/B Testing, Ad Hoc Analysis

Data & Databases: Pandas, PostgreSQL, MySQL, SQLAlchemy

Cloud & Tools: AWS, Docker, Git, GitHub Actions

Certifications: AWS Certified Solutions Architect – Associate; AWS Certified Cloud Practitioner

WORK EXPERIENCE

ZJW Inc., Ontario, CA

Jun 2026 – Present

E-commerce Data Analyst

- Analyze e-commerce sales data — revenue trends, sell-through rate, and days-to-sell — across 10 storefronts on Amazon, eBay, and Walmart, identifying platform-level differences in order volume and sales performance to support pricing and inventory decisions.
- Reorganize an unstructured SKU catalog into a multi-level taxonomy (category, sub-category, condition grade) covering approximately 10,000 orders per month to support category-level pricing analysis.
- Segment products by sell-through rate to flag markdown candidates and apply differentiated pricing and advertising by brand tier for PC-hardware, which accounts for 22% of total store orders.
- Build weekly performance reports tracking conversion rate, average selling price, and sell-through rate to support ongoing pricing and inventory planning.

Xinjiang Construction Company, China

Oct 2020 – Dec 2023

Financial Operations Analyst

- Analyzed financial transactions, invoices, and reimbursement data to identify expense trends, spending variances, and unusual fluctuations, supporting cost control and financial oversight.
- Organized and maintained financial datasets across expense categories and business activities, improving data consistency and enabling recurring financial analysis and reporting.
- Prepared financial reports and visual summaries on cash movements, operating expenses, and resource allocation, providing senior management with insights to support planning and decision-making.

PROJECT EXPERIENCE

Independent Data Analysis Projects | Financial & Pricing Case Studies | 2026

[Portfolio](#)

Financial Signal Diagnosis | 14-Year Multi-Company Financial Analysis

Tech Stack: Python, Pandas, Matplotlib, Tableau, GitHub

- Analyzed 14 years of financial data across 7 public companies to identify recurring divergences between headline growth metrics and underlying cash flow, margin, and equity trends.
- Diagnosed multiple types of financial signal mismatches, including margin volatility masked by stable averages, cash-flow timing artifacts, and profit-vs-cash divergence, each translated into an actionable finding.
- Backed every finding with supporting charts (10 total) and published the analysis as a reproducible GitHub repository with a companion interactive Tableau dashboard.

Meal Delivery Pricing Strategy | Pricing & Promotion Case Study

- Analyzed 456,548 rows of operational data across 145 weeks and 77 fulfillment centers to test whether discount strategy should differ by category.
- Found price elasticity varies roughly 19x across categories, validated against actual revenue rather than the regression coefficient alone; quantified diminishing returns from stacking promotions (2.66x actual lift vs. 3.80x predicted under independence).
- Designed an A/B test with a sample-size calculation based on real revenue variance to evaluate the pricing change before rollout.

EDUCATION

Northeastern University, Boston, MA

Dec 2025

Master of science in Informatics — Cloud Computing Applications and Management, GPA: 3.87

Xinjiang University of Economics and Finance, China

Jun 2020

Bachelor of Economics in International Economics and Trade
